Title of the research project

This is the description of the project. You may include an abstract or portion of a paper for this section. Try to avoid using too much jargon but remember that these students are very bright and high achieving. Keep it short (1 page max) and use images if it helps.

If you have a second project, you can include it here or submit a separate project description. Your description will be included in the RMP project handbook and will be read by each RMP student.

Disciplines: Give us a list disciplines that your project covers. Keywords are great here!

Sample Schedule:
This can be a list, description, or table. Students want to get a sense of what a day with you and the project will be like.
