Dear Freshman Summer Start Student,

Congratulations on your acceptance into the Freshman Summer Start Program! Your next step is to select your summer courses. This document includes the list of classes available to you during FSSP as well as the steps to enrollment.

Next Steps

1. Review the schedule of classes (read the course descriptions and consider which classes you would like to take).
2. Complete the online course enrollment form that was sent to you via email.

If you are having trouble accessing or submitting the course enrollment form, please send an email to fssp@summer.ucsb.edu.

Course Enrollment Process

After reviewing the schedule of classes and utilizing the additional resources on page 4-9, you will need to submit your course preferences through the online FSSP course enrollment form. When completing the course enrollment form, please consider the following:

• The course enrollment form requires you to submit 6 unique course preferences. Please do not list the same course more than once, as it will not increase your chance of being enrolled in that course and will likely delay your course enrollment process.

• FSSP advising staff will make every attempt to enroll you in top course preferences. However, given scheduling conflicts, course space, and other considerations, this might not always be possible. Please check your UCSB email regularly, as FSSP advising staff might need to contact you via email with clarifying questions or to request additional course preferences from you.

• Please be sure to send your official test scores (SAT, ACT, SAT Subject tests, TOEFL, AP, and/or IB) immediately to UCSB if you have not already done so. Scores must be submitted directly from the testing agency.

• If you request a course that you’re currently fulfilling a prerequisite for (or recently completed at the end of your senior year), we will need to place you into a filler course to help you maintain eligibility to participate in FSSP. After your official AP/IB/SAT/ACT scores have confirmed your placement, FSSP advising staff will adjust your schedule accordingly where possible.

• You will receive email communication from FSSP advising staff once your preliminary schedule is complete with instructions about how to view it on GOLD.

• As you participate in orientation this summer and sign up for your Fall 2021 courses, please be mindful of the courses that you listed on your enrollment form for FSSP, as you cannot be registered for the same course during two separate quarters.

• The online course enrollment form can only be submitted once. As such, please be thoughtful about your course choices as you complete it. If you would like to make changes to your preliminary schedule, you will need to submit the FSSP Schedule Change Request form (this form can also only be submitted once). These requests will be accommodated only as time and space permit, and submission of this form does not guarantee that your schedule will be changed. The FSSP Schedule Change Request form can be found here.

• You will learn how to make changes to your class schedule during orientation and will have access to make adjustments to your own FSSP schedule on GOLD on the evening of July 30, 2021, prior to the start of classes.

Schedule of Classes

Many of the courses listed in this guide will help you fulfill specific General Education (GE) or pre-major requirements. Many will also fulfill Special Subject area requirements unique to your College. You will also have the opportunity to enroll in FSSP Seminars and Courses that have been created for, and are only available to, FSSP students. This packet will describe these seminars and courses, followed by the schedule of summer classes. For detailed information about degree requirements, advanced placement scores, and UCSB graduation requirements, refer to the section below.

We are very happy that you’ve decided to participate in FSSP, and we look forward to connecting with you this summer!

Sincerely,
Dr. Ralph Gallucci
Director, FSSP
In order to graduate from UC Santa Barbara, students must complete a series of academic requirements. There are University-wide requirements, General Education requirements, specific College requirements, and requirements based on majors and/or minors.

All of this information can be found in UCSB’s General Catalog.

Included in the General Catalog is also information about Advanced Placement Scores and International Baccalaureate credits.

To assist you with deciding which courses to take during FSSP, we have provided segments of the General Catalog that may be applicable to you.

In order to better understand the degree requirements of the College of Letters and Science (L&S), please view the appropriate webpage based on your proposed degree:

Writing and Math Placement Information

Writing and Math Courses
During FSSP, students may be able to take either Writing or Math courses to satisfy University requirements.

Writing Courses
Writing 2: Available to FSSP students who have fulfilled the UC Entry Level Writing Requirement via one of the methods listed below.

English 10: This course is equivalent to Writing 50. Given that Writing 2 is a prerequisite for this course, English 10 will only be available to FSSP students who have received a score of 4 on the AP English Language or English Composition exam.

Notes on Writing Courses
Students are not guaranteed placement in a writing course during FSSP. FSSP Advising Staff will enroll students in the appropriate writing courses when official test scores are available.

Students who would like to enroll in Writing 2 should indicate this course as a preference on their course enrollment form. Students should only indicate they they would like to enroll in Writing 2 if they have satisfied/plan to satisfy the Entry Level Writing Requirement via one of the following methods prior to the start of the program:

- Score of 3 on Advanced Placement exam in English Language and Composition or English Composition and Literature
- Score of 30 or higher on the ACT Combined English Language Arts (ELA) exam
- Score of 680 or higher on the SAT Writing exam
- Score of 5 or higher on the International Baccalaureate (IB) higher level English A exam
- Score of 6 or higher on the International Baccalaureate (IB) standard level English A1 exam

Students who would like to enroll in English 10 should indicate this course as a preference on their course enrollment form. Students will need to indicate how they have satisfied/plan to satisfy the prerequisite for this course through an AP exam score prior to the start of the program.

International Students who are not eligible for Writing 2 will take the English Language Placement Exam that is typically offered in the fall. For more information, please email jppatterson@hfa.ucsb.edu.

Notes on Math Courses
Math 34A: Students who choose Math 34A will be enrolled immediately, as no Math Placement Exam (MPE) is required.

Math 3A: Students interested in enrolling in Math 3A must take the Math Placement Exam (MPE) online at https://math.ucsb.edu/undergrad/course-placement unless they receive a score of 2 on the AP CALC AB test. If you are interested in enrolling in this course during the summer, you should complete the Math Placement Exam (MPE) prior to completing your online course enrollment form for FSSP.

If you qualify for a math course higher than Math 3A because of AP/IB test scores, previous college experience, or by other means, please note that FSSP advising staff will not be able to enroll you until your official test scores have been received by UCSB. If you have questions about this, please email fssp@summer.ucsb.edu. For more information about all Math courses, please refer to the Mathematics Department website at math.ucsb.edu/undergrad
The following list includes courses offered in Summer 2021 which meet or partially meet University Requirements, General Education, and Special Subject Requirements. Not all courses meet requirements for all undergraduates; students are responsible for knowing which specific requirements pertain to them.

Special Seminars and Courses

FSSP Common Course

Interdisciplinary (INT) 95A
All students participating in FSSP will enroll in this 1-unit course — INT 95A, The Modern Research University. The course is only available to FSSP students and is moderated by the FSSP Director, Dr. Ralph Gallucci. This course introduces students to internationally recognized research currently being conducted on campus. As part of the course, students will meet faculty and learn about opportunities to become involved in undergraduate research during their time at UCSB. In small TA sections, graduate student mentors will further introduce students to all the opportunities and resources available to them on campus.

Freshman Seminars
UC Santa Barbara offers an exciting educational opportunity for members of the freshman class — Freshman Seminars. These small group seminars, with a maximum of twenty students, will be taught by faculty who have volunteered their time and effort because they want to teach students who are early in their UCSB careers. Facilitating student-faculty contact is one of the major goals of the Freshman Seminar. Students have the opportunity to take up to three of the following Freshman Seminars during FSSP:

INT 94FC. Screen Classics: From The Gladiator to the Clash of the Titans (1 unit)
This class examines several Hollywood films dealing with classical subjects, both historical and mythological, which have been produced in the last twenty years. We will view excerpts from the Gladiator (2000), Troy (2004), Alexander the Great (2004), the HBO series Rome (2005-2007), Lightning Thief (2010), and The Clash of the Titans (2010), and ask what social trends may be behind this renaissance of interest in classics; we will also attempt to find the generic patterns evinced by these films, whose target audiences range from children to adult audiences with taste for violent and explicitly sexual material. Our goal in noting tendencies and generic patterns will be to identify the role that the classical past has come to play in popular culture.

INT 94GZ. Mummies, Myths and Magic: Surviving Death in Ancient Egypt (1 unit)
The ancient Egyptians and Nubians spent a great deal of time and effort preparing for the afterlife, making mummies and providing them with the equipment that would allow them to live forever. Mummies have been a source of fascination for centuries — witness most recently the success of Universal’s remake of “The Mummy.” So what makes a mummy? What was the most important funerary equipment for a successful afterlife? Just how much did immortality cost an average or above average ancient Egyptian? Drawing upon his own work for the recent Mummy movies, archaeology at Luxor’s Theban Necropolis and in Sudanese Nubia, Professor Smith will explore some modern myths and the fascinating insights we can gain from mummies and their equipment.

INT 94IM. Research Methods and Opportunities in the Social Sciences (1 unit)
Leading professors in the social sciences are doing some exciting work at UCSB, and this course provides a glimpse into what they have been up to. Whether their research has been about banking policy, political behavior, mass communication and popular culture, or race, class, and gender inequality, their work has had a major impact on our understanding of complex social processes and problems. This course will focus on how your professors develop research projects, the methods they have used to gather new information, and then the brilliant theories they have proposed to explain their findings. Through this discussion, students will get a better sense of the multiple career opportunities available to students interested in the social sciences, including careers in law, business, public policy, and other related professions. We end with a discussion of the many opportunities available to undergraduates to engage in research, either on their own projects, or as a research assistant to a faculty member.

INT 94RG. Introduction to Engineering and its Applications (1 unit)
This seminar sequence provides an overview of electrical, mechanical, and computer engineering in a concise and comprehensive manner. The full-spectrum topics include communications, signal processing, VLSI, control systems, robotics, and computer-aided design in hardware, software, system integration, as well as industrial applications. The seminars will also give you an excellent perspective of the curriculum, the advancement in the industry, as well as research directions in graduate study. In addition to presentations by faculty, the course includes a tour of engineering research facilities.

INT 94VK. Building a strong foundation for CHEM 1A (1 unit)
Feeling a little nervous about taking general chemistry? Fear not – this seminar is designed to help you build confidence and a solid foundation so you can succeed in the general chemistry series!
Topics covered include: review of the fundamental math concepts needed in general chemistry, discussion of study skills and how to develop a study plan, overview of campus resources to help you succeed, and a preview of a few selected topics you will see in CHEM 1A. This course is designed for students who have a little or no prior experience with chemistry and are looking to get a strong start in the general chemistry series.

INT 94ZZ. Asians and Asian Americans in Hollywood Films (1 unit)
In this seminar we will explore images of Asian and Asian Americans in Hollywood films. Images of the early 20th century will be compared with those created in the later periods. We will also examine roles played by Asian American actors/actresses in Hollywood films.

Intro to Undergraduate Research Course
Classics 99. Introduction to Undergraduate Research in the Humanities: The History of Democracy (1-3 units)
We live in a democracy. Most of us likely believe that it is the best form of government, but what is its historical background? This class traces the origins of democratic government from ancient times up through the present. We begin in ancient Iraq, in a kingdom called Sumer, and read about a political system called “primitive democracy.” We will also look at other examples of “primitive democracy” in evidence among ancient tribal societies and chiefdoms and in the modern anthropological record. We next examine the political systems of the Greeks and Romans, and how they have influenced our modern notions of democracy as well as socialism and communism since medieval times.

College of Letters and Science Honors Program Opportunities
Students in the Honors Program can meet their first year honors experience requirement this summer by enrolling in these two courses.

Classics 40H (1-unit discussion section) taken in conjunction with Greek Mythology (description below)

Classics 99. The History of Democracy (1-3 units) (description above)

Classics 40. Greek Mythology (4 units)
This course examines the world of Greek mythology: the origin of the gods, the universe, and humans as well as the stories of the major Greek heroes, such as Cadmus, Perseus, Heracles, Theseus, Achilles, Odysseus, and Penelope. Readings include the Near Eastern Epic of Gilgamesh, Homer's Iliad and Odyssey, Hesiod's Theogony and Works and Days, and the Homeric Hymns. Special attention will be given to the religious, archaeological, social, historical, and cultural background of these works. Moreover, the class examines theories of myth interpretation and the influence of Greek myth in popular culture today. (This course satisfies Area G and the European Traditions requirements and is open to all FSSP students.)

Interdisciplinary Humanities Course
INT 35LT - Experiencing Shakespeare (8 units)
This innovative course brings together faculty from the departments of English and Theater & Dance to offer students an immersive experience of Shakespeare that combines performance, literary study, and research. Students can expect Shakespeare to come to life on page and stage as they experience these multi-faceted plays from a variety of perspectives.

We are excited to announce that FSSP students are eligible to apply for an Experiencing Shakespeare Scholarship! To apply for a scholarship, please send an email describing what interests you about this course (maximum 300 words). Email your essay to fssp@summer.ucsb.edu by June 30th.

Enrichment Courses
INT 64 - Career Development (2 units)
This course provides students with a foundation for academic, personal, and career success. Through personal assessment activities that examine interests, personality styles, values, skills, and strengths, this course assists students in their exploration of college majors and career options while further developing an understanding of themselves as beginning college students. The focus will be on researching academic departments, career paths, and labor market trends while providing students with tools and strategies for reflection, goal-setting, and success.
